

SCHOOLHOUSE POND
Avon, Franklin County
U.S.G.S. Phillips, Maine (7½')

Fishes

Brook trout

Physical Characteristics

Area - 3 acres	Temperatures
	Surface - 70°F
Maximum depth - 20 feet	19 feet - 47°F

Principal fishery: Brook trout

Schoolhouse Pond is located north of Day Mountain. The pond has no inlet, but two outlets. One, Dicky Brook, flows north and the other flows south to form the headwaters to Temple Stream. The shoreline is undeveloped.

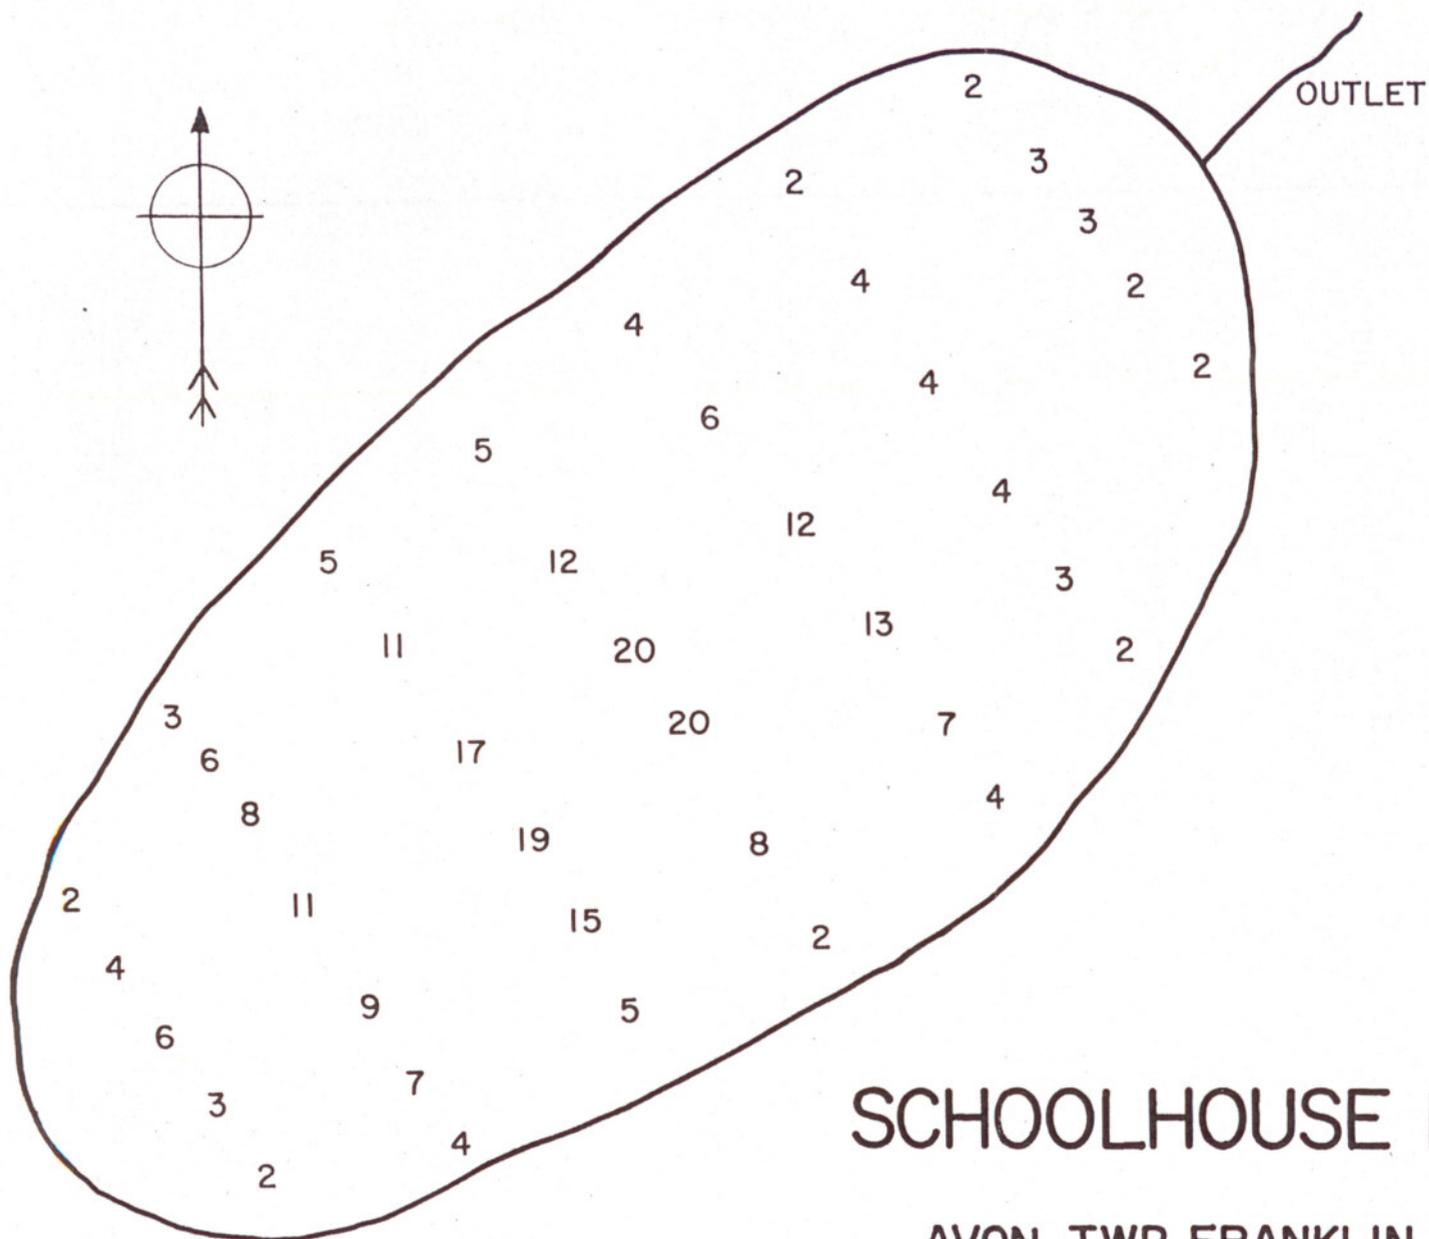

Water quality is good for coldwater gamefish. The muddy bottom provides no natural reproduction, so brook trout are stocked annually to provide a fishery. Trout grow well in Schoolhouse Pond, despite the ponds small size, due to the lack of competing species.

Schoolhouse Pond is reached via a series of old logging roads from either Temple or Avon. The pond is open to fishing with special regulations in effect.

Surveyed - August, 1961
(Revised - 1983, 1995)
